

DataPulse – UI/UX Design Mockups

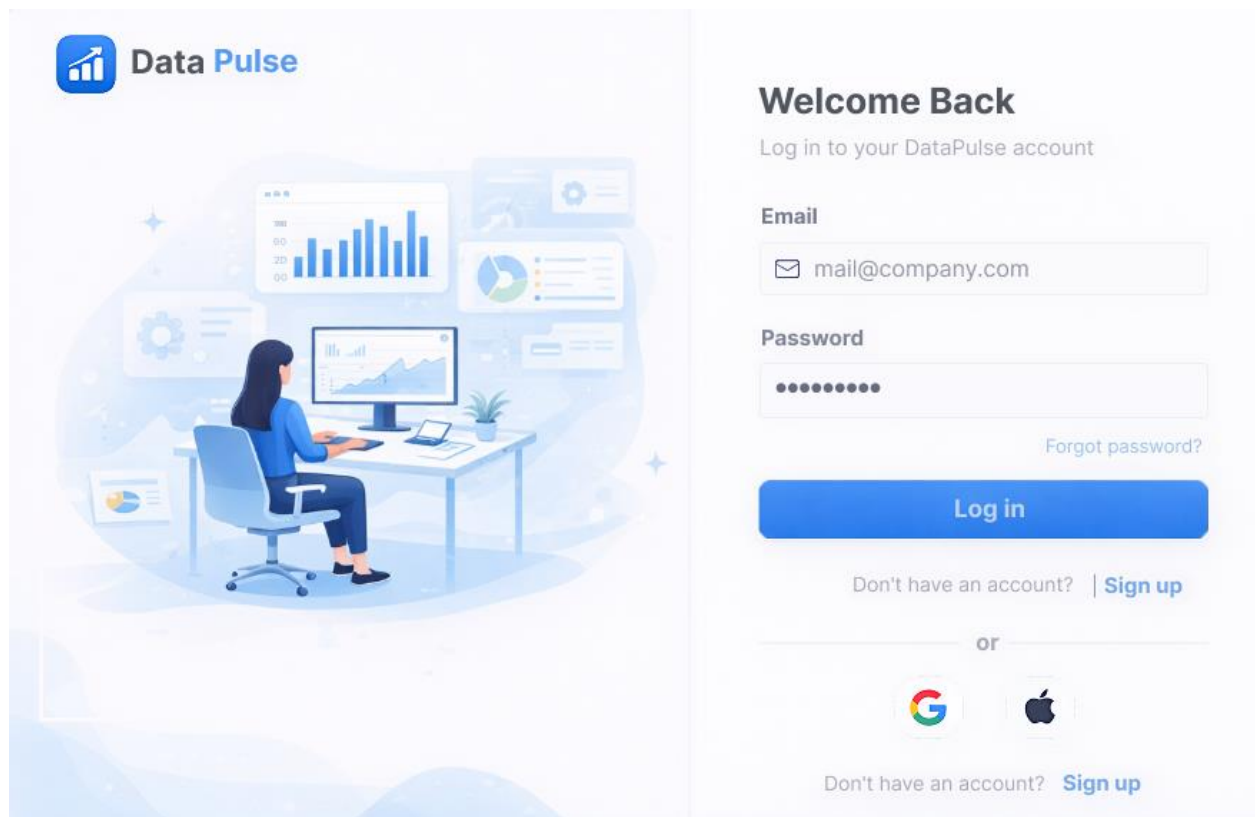

Fundamentals of Software Engineering Project

Introduction

These interface mockups were designed for the DataPulse system based on the project requirements. The designs represent the main user-facing screens of the platform, including authentication, navigation, analytics dashboards, forecasting, and data exploration modules.

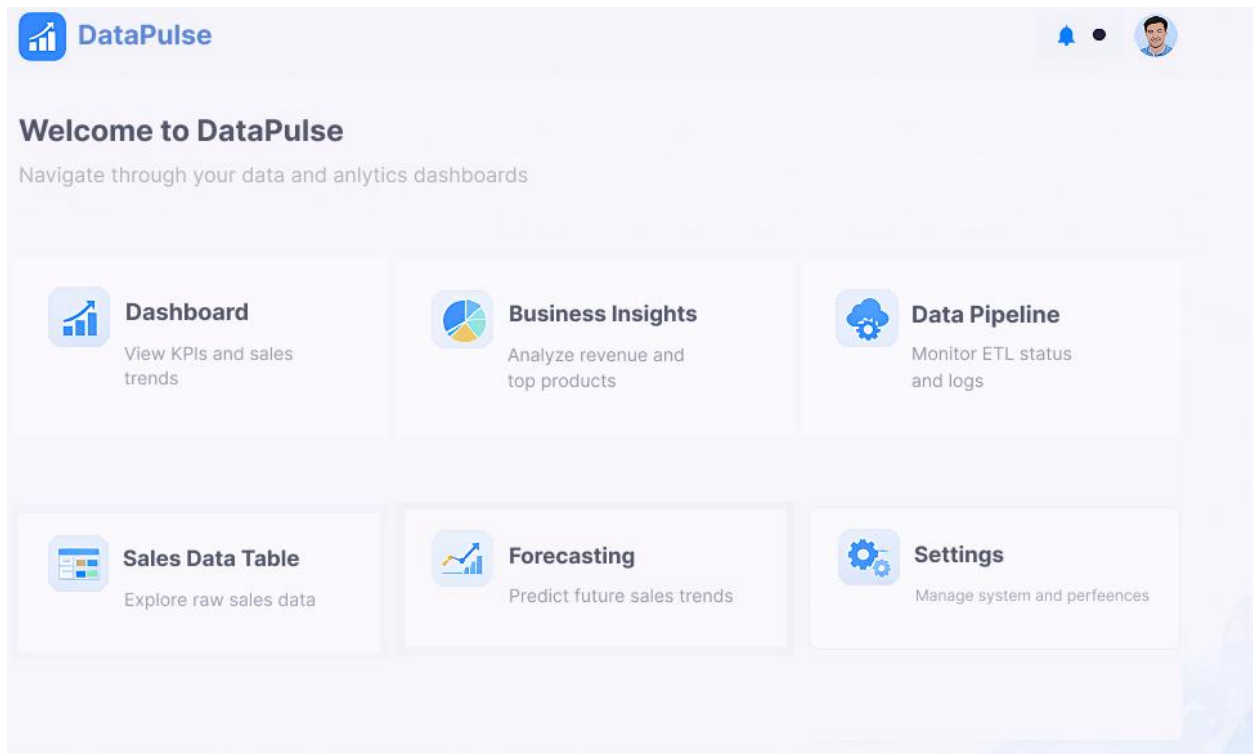

1. Login Page

User authentication interface for secure access to the DataPulse system.

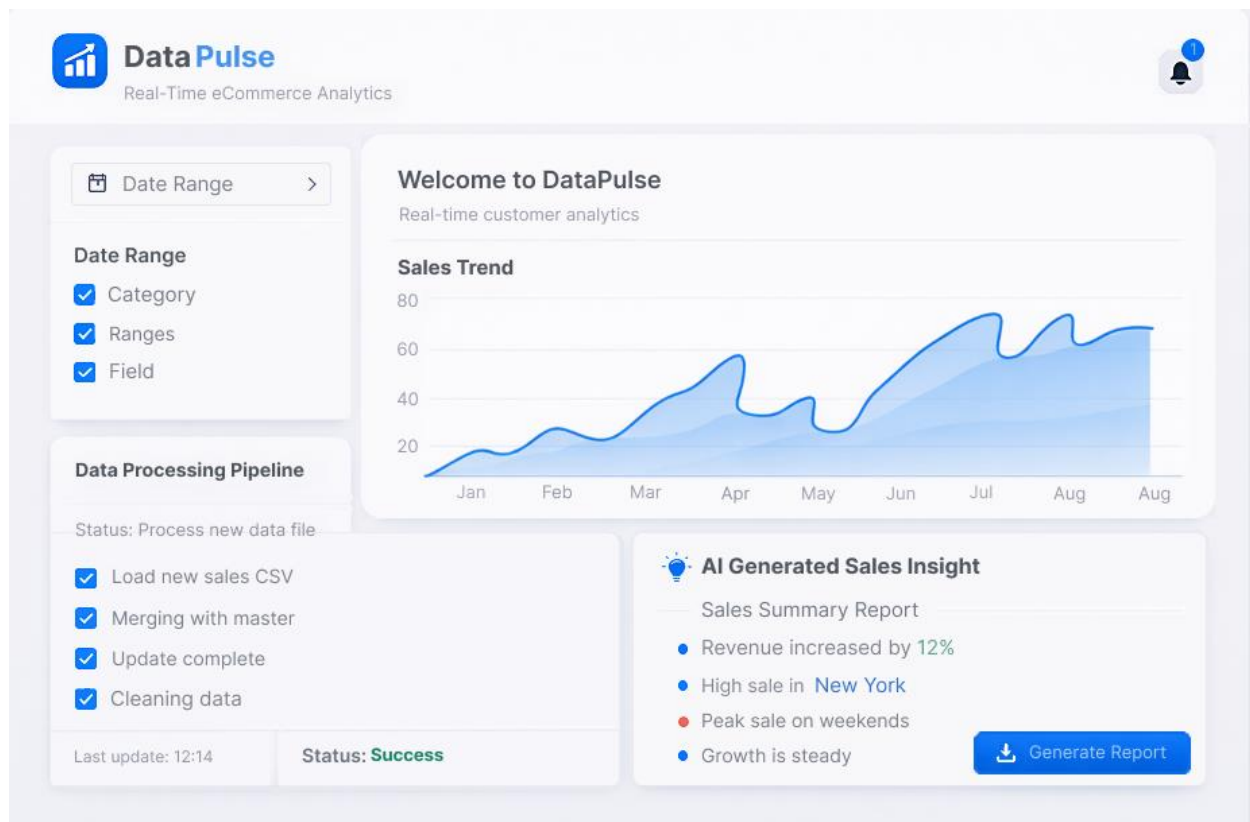

2. Main Menu Page

Central navigation screen providing access to all core modules of the system.

3. Dashboard Page

Main analytics dashboard displaying KPI metrics, sales trends, data pipeline status, and AI-generated sales insights.

4. Business Insights Page

Advanced analytics view showing revenue trends, category distribution, KPI summaries, forecasting, and sales data tables.
